

Meeting of the superior council of sisters at 11:00 A.M. to solve about the change from the actual patriarchal calendar to a matriarchal calendar.

Factual background:

The sacred history of The Universal Gynecocratic Republic begins 57 years ago when our sisters managed to connect the planet Venus with the Earth. It is for this reason that we live in the year 57 A.V. (After Venera) in fact we count the universal time from that historical moment. But it doesn't make sense for us to maintain a twelve-month patriarchal calendar.

The superior council of sisters agrees:

Implement a matriarchal calendar of thirteen months a year. Following the average frequency of our menstrual period, each month will have twenty-eight days except the first month, which will have twenty-nine. Every four years, it will be a leap year, and one more day will be added to the last month of the year, which will have twenty-nine days just like the first month. The identity documents prior to this resolution retain their validity despite being issued in the patriarchal calendar. The names of the thirteen months will represent our matriarchal culture.
